

In the adilas system, select the state and add the Username, Password and Lic Number.

BioTrack API - Illinois - Welcome to the biotrack api settings page. On this page you can input your biotrack api credentials to test to see if they work. You may also enable testing if you would like to test first.

API Settings ⚙️ **See additional image for settings functions**

Your API access details are obtained from biotrack. Input them below. In order to submit this form successfully your credentials need to be correct.

Please Select Your State:

Enable BioTrack API: **The enable box allows turning on or off the functionality**

BioTrack Username: *

BioTrack Password: *

BioTrack License #: *

Training Mode: **Training mode allows for testing prior to going live.**

Add a checkmark to the Inventory Category that requires the Weight field as the Quantity.

If there is no checkmark the normal Quantity field and UofM will be used.

Limit	Id #	Category Name
<input type="checkbox"/>	3750	Cannabis
<input type="checkbox"/>	1190	Clones/Seeds
<input type="checkbox"/>	2212	Clothes
<input type="checkbox"/>	1236	Drinkables
<input checked="" type="checkbox"/>	1135	Edibles
<input type="checkbox"/>	3543	Gummy

Clicking on the settings gear allows for different Quantity/ UofM reporting.

Select the category you wish to change the reporting method.

Sales are pushed to the state real time

This generates a real time Success or Error message
